UI Layout Files:

Default - _layouts/default.html
Blog - _layouts/blog.html
Members - _layouts/members.html
Navigation Bar - _includes/navigation.html

Navigation Bar:

Layout - _includes/navigation.html
Content - _data/navigation.yml
Notes:

If you want to change the navigation bar, please change the content in _data/navigation.yml and put it in the order you wish to display them.

Home Page:

Layout: Default Layout (_layouts/default.html)
Content: index.html
Video: assets/videos/homepage_random_walk.mp4
Notes:

Latest four blogs will be displayed on the home page.

Research Page:

Layout: pages/research.html
Content: _research/
Template: templates/research_template.md
Notes:

Adding a research:

- Copy the template from templates/research_template.md
 - Create a file in _research/
 - Add image to assets/images/research/
 - Add a category if not exist in _data/research_display_order.yml
-

Publications Page:

Layout: pages/publications.html

Content: _publications/publications_content.md

Template: templates/publication_template.md

Notes:

Adding a publication:

- Open the EndNoteScript
 - Make sure you have the endnote file that you want to be added
 - By default, the filename should be "Edison_endnote_pubs.txt"
 - If not, change file name in line 3 of index.js
 - Run the file: `$ node index.js`
 - Output will be saved to output.txt file
 - Open output.txt and copy the contents
 - Paste the content in _publications/publications_content.md
 - Add an year if not exist in _data/publication_years.yml
-

Teaching Page:

Layout: pages/teaching.html

Content: _teaching/

Template: templates/teaching_template.md

Notes:

Adding a teaching:

- Copy the template from templates/teaching_template.md
 - Create a file in _teaching/
 - Add image to assets/images/teaching/
 - Add a category if not exist in _data/teaching_display_order.yml
-

Members Page:

Layout: pages/members.html

Content: _members/

Template: templates/member_template.md

Notes:

Adding a member:

- Copy the template from templates/member_template.md
 - Create a file in _members/
 - Add image to assets/images/members
 - Add a category if not exist in _data/members_display_order.yml
-

Blog Page:

Layout: pages/blog.html

Content: _posts/

Template: templates/blog_template.md

Notes:

Adding a blog:

- Copy the template from templates/blog_template.md
- Create a file in _posts/
- File name should be in this format: YYYY-MM-DD-filename.md
